MATHEMATICS  
Paper-II (Calculus-I)

Time Allowed : Three Hours]

[Maximum Marks : 30

Note :—Attempt five questions in all, selecting at least two questions from each Unit.

UNIT-I

1. (a) Prove that between any two distinct real numbers, there lie an infinite number of real numbers. 3

(b) If  $|x - 3| < 2$ , then prove that :

$$-\frac{9}{8} < \frac{x^2 - 2}{x + 3} < \frac{15}{4} \quad 3$$

2. (a) Solve the inequality  $\frac{x - 2}{x + 2} < \frac{x + 1}{x - 1}$  . 3

(b) Prove that  $\text{Lt}_{x \rightarrow a} \frac{1}{x - a}$  does not exist. 3

3. (a) Let  $f$  be a continuous function defined in  $[a, b]$ ,  $f(a) \neq f(b)$  and let  $k$  be any number lying between  $f(a)$  and  $f(b)$ . Then prove that there exists  $c \in (a, b)$  such that  $f(c) = k$ . 3

- (b) Show that the function  $f$  defined by :

$$f(x) = \begin{cases} [x - 2] + [2 - x] & ; x \neq 2 \\ 0 & ; x = 2 \end{cases}$$

is discontinuous at  $x = 2$ . 3

4. (a) Evaluate  $\lim_{x \rightarrow 0} \left[ \frac{2(\cosh x - 1)}{x^2} \right]^{\frac{1}{x^2}}$ . 3

- (b) Show that  $\lim_{x \rightarrow 0} \frac{x^2 \sin \frac{1}{x}}{\tan x}$  exists, but cannot be evaluated by L'Hospital rule. What is the limit? 3

### UNIT-II

5. (a) State and prove Cauchy's Mean Value theorem. 3  
 (b) Use Mean Value theorem to prove that :

$$\frac{x}{1+x} < \log(1+x) < x \text{ for } x > -1, x \neq 0. \quad 3$$

6. (a) Expand  $\cos x$  in powers of  $x - \frac{\pi}{2}$  by using Taylor's theorem. 3

- (b) Show that  $\frac{d}{dx} [\tanh(\log x)] = \frac{4x}{(x^2 + 1)^2}$ . 3

7. (a) Using Maclaurin's theorem, expand the function  
 $f(x) = e^{\sin x}$ . 3

- (b) Prove that  $\tanh^{-1} x = \frac{1}{2} \log \left( \frac{1+x}{1-x} \right)$ ,  $|x| < 1$ , and then find  
its derivative. 3

8. (a) If  $x^3 + y^3 - 3axy = 0$ , then show that :

$$y_2 = -\frac{2a^3xy}{(y^2 - ax)^3} \quad 3$$

- (b) If  $y = \frac{\log x}{x}$ , then prove that :

$$y_n = \frac{(-1)^n \lfloor n \rfloor}{x^{n+1}} \left[ \log x - 1 - \frac{1}{2} - \frac{1}{3} - \dots - \frac{1}{n} \right] \quad 3$$
